

HOLDEN

Master Collection 2nd Edition

After many months of in-depth research, the 2nd release in the Kryptyx Holden Master Collection is now here.

The 2nd Edition includes 110 new model variants, the continuation of the Badge Series and the introduction of Workshop Manuals, Advertising Posters, four new Case Cards and five new Holden driver signature cards.

With a limited factory run of only 2,000 security-sealed displays, collectors are guaranteed absolute exclusivity.

HOLDEN

Master Collection 2nd Edition

Following on the standards of detail and quality in the 1st Series, Kryptyx is proud to announce the release of the 2nd instalment in the Holden Master Collection.

With sequential card numbering as part of the four-series set, this new release gives Holden fans the chance to continue

building their collection of the most comprehensive release of Holden memorabilia in existence.

With only 2,000 boxes of 36 packs made, Kryptyx is again limiting factory production to ensure absolute exclusivity for card collectors and Holden fans alike.

Insert Cards

The Master Collection 2nd Edition also marks the first time Kryptyx has released a memorabilia product featuring its very own holographic security seal on every insert card, and will become the standard across all Kryptyx collectibles moving forward.

This seal features a number of levels of security and secret information ensuring the genuine nature of the product, and is the same technology used by various Australian Intelligence Agencies, and on the Euro note.

Base Cards

Cards 111 to 220 continue to detail each and every Holden model ever made as well as mark some of the more important moments in the Holden company's history. Again with a commentary by motor historian Bill Tuckey, these cards form a set inside the larger four edition collection.

Advertising Posters

Also a new addition to the Master Collection, advertising posters feature the rich history of Holden outside the factory and in our everyday lives, from humble beginnings unveiling 'Australia's own car' to Holden's 50th Anniversary, this subset of ten is an absolute must have, and a centrepiece in the collection.

Workshop Manuals

New to the 2nd Edition, these Workshop Manuals detail ten of the most popular Holden models through to the 1968 20yr Parts Catalogue, all out of print for many years. As classic in design as the cars they're based on, look for the FJ, the EH and the Powerglide Automatic to begin with.

Badge Cards

B15 – B28 continue with the retro Badge collection from the first series. Each badge designed to compliment the car it was put on, this is artwork in itself, and a very important part of Holden's development program for every model.

Signature Cards

Continuing on with Holden's driving legends, the 2nd Edition features five new signature cards, each only 200 numbered cards released. This time around we present Holden mainstays and household names in Colin Bond, John Harvey, Peter Brock, Larry Perkins and Jim Richards as we continue to feature Holden's rich racing heritage.
